THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH  L. At the beginning of February 1948, six miners from the bardum mines at  Skofljica (six kilomoters south of Ljubljana) obtained permission from the  Slovens authorities to proceed with the covolopaons of a new rich area of bardum deposito. The miners promised to have operations under way by one end of April.  2. The deposit of bardum discovered by whate miners is located near Litiga (twenty kilomoteru each of Ljubljana) and masares some thirty kilomoteru in length by two or three kilomoters in middh.  3. Bardum is of particular importance to the dye factory at Demzalu, to the chemical industry at Brastnik and to the metaliurgical plants at Calje.  Demzals FED  Class.
